

Krakow, 12 May 2020

Ladies and gentlemen,

During this unprecedented global health crisis, our thoughts go to the victims of the COVID-19 and all those fighting the disease, the businesses, and communities struggling in these difficult times.

The coronavirus pandemic impacting our world in unforeseen ways and the situation changing daily, the extension of the containment throughout Europe and the travel restrictions being reinforced all over the world, make it impossible to hold Packaging Innovations as planned, from June 24 to 25, 2020. The entire Packaging Innovations team sincerely regrets this, especially after all the efforts pulled out for the postponement in June by all the stakeholders involved.

In agreement with the Polish government and virologists and in order to ensure the safety and comfort of B2B meetings, a sanitary regime plan is being developed. And it will be successfully used on trade fairs like Packaging Innovations. Therefore, for the sake of your health and safety, your employees and trade fair participants, we decided to postpone the date of the Packaging Innovations Trade Fair. **The new date is supposed to be the second part of September 2020. The final date will be announced at least at the end of May.** The reason why we don't know it so far, is a really busy Autumn. All of Polish events have postponed to Autumn and venue operators are doing their best to fit it all. This is a very complex process, so this is why it takes a long time.

All the participants and partners will be contacted very soon in order to best manage the consequences of this decision. We will inform you as soon as possible about the final date and current activities to ensure you are comfortable in preparing for the event.

We thank you for your understanding and support. We hope that you and your relatives are in good health. Please stay safe.

Yours sincerely,

Ewa Woch
Vice-President of Targi w Krakowie Sp. z o.o.
(Organizer of Packaging Innovations Trade Fair in Poland)
